Date	03 October 2026
Team ID	**SWTID-2026-7735**
Project Name	**Auto Ticket Classification using Flow Designer**
Maximum Marks	4 Marks

Ideation Phase

Brainstorm & Idea Prioritization Template

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The school IT helpdesk receives multiple incident requests daily from students and teachers, such as Wi-Fi issues, projector failures, password problems, and slow computers. Currently, IT staff manually reviews each request and assigns a category, which is time-consuming and inefficient. This project automates ticket classification using ServiceNow Flow Designer by analyzing keywords in the incident's short description and description fields.

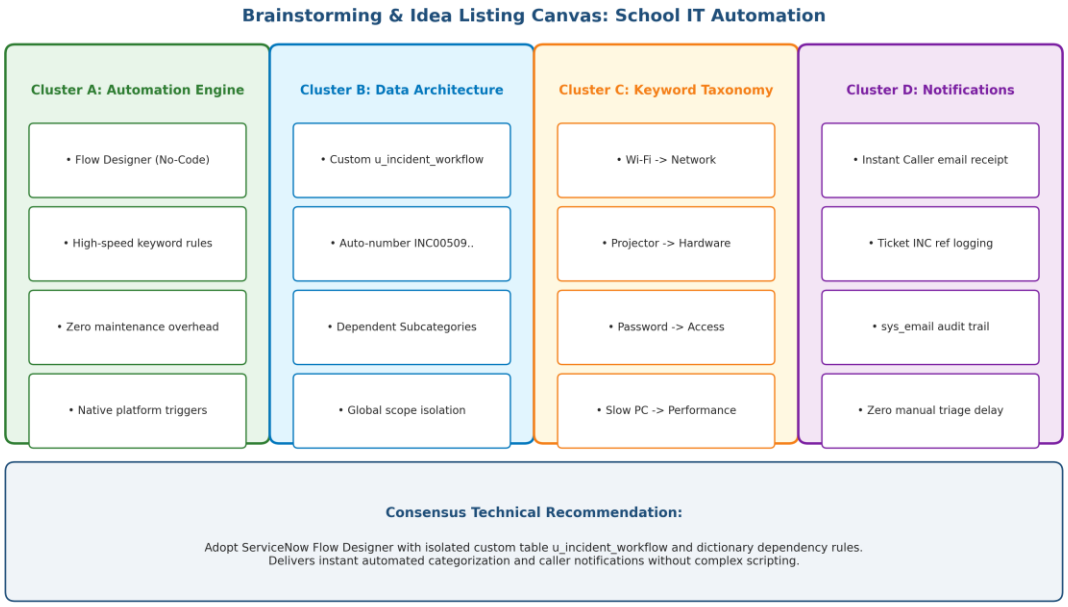

Figure 1.1: Brainstorming Workshop Idea Listing & Architectural Clustering Canvas

Step-2: Brainstorm, Idea Listing and Grouping

During the ideation workshop, potential technical mechanisms were categorized into 4 operational clusters: (A) Automation Engines (Flow Designer vs Business Rules vs ML); (B) Custom Data Store (Isolated Table u_incident_workflow vs OOB Incident); (C) Taxonomy & Dependent Choices; (D) Notification Services.

Step-3: Idea Prioritization

Ideas were prioritized on a Value vs. Complexity matrix to maximize immediate student and teacher satisfaction with zero maintenance complexity.

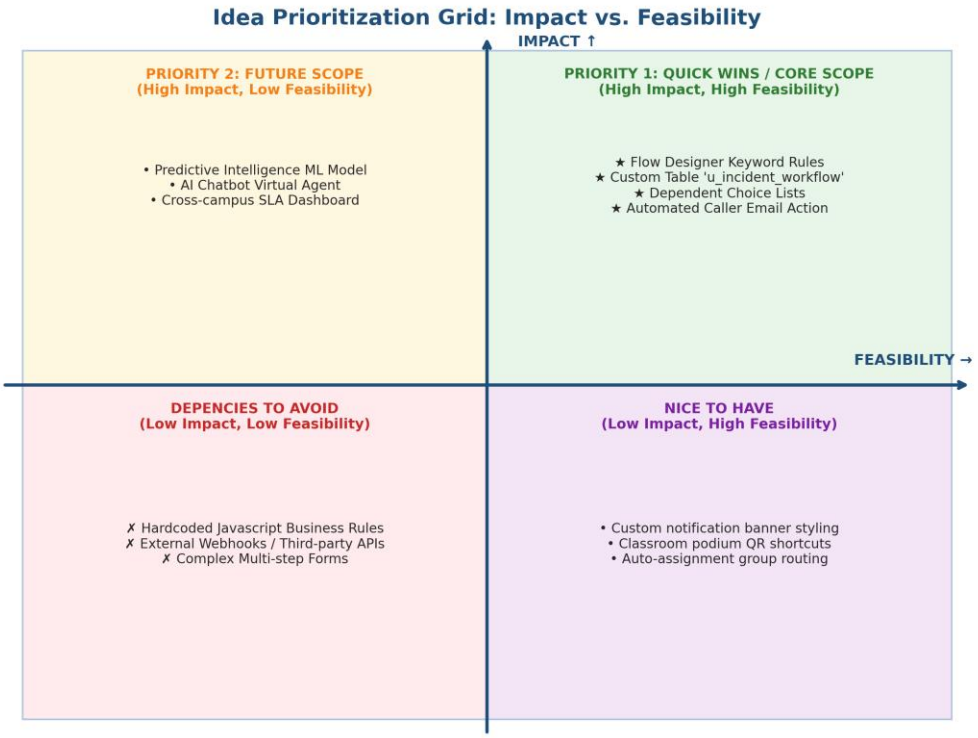

Figure 1.2: Idea Prioritization Matrix (Impact vs. Feasibility)

Idea / Solution Concept	Feasibility	Impact	Complexity	Prioritization Decision
Flow Designer Keyword Logic (Wi-Fi, Projector, Password, Performance)	High	High	Low (No-Code)	P1 - Core Scope (Must Have)
Custom Table 'Incident WorkFlow' with Auto Numbering	High	High	Low	P1 - Core Scope (Must Have)
Dictionary Dependency (Category -> Subcategory)	High	High	Low	P1 - Core Scope (Must Have)
Automated Flow Designer Caller Email Confirmation	High	High	Low	P1 - Core Scope (Must Have)

Predictive Intelligence / ML Model Auto-Triage	Medium	High	High (Requires Pro license)	P3 - Future Scope (Post MVP)
