Customer Journey Map

Customer Journey Map: School IT Support Experience

A Customer Journey Map visualizes the complete student and educator journey from initial classroom technology failure to automated classification and resolution.

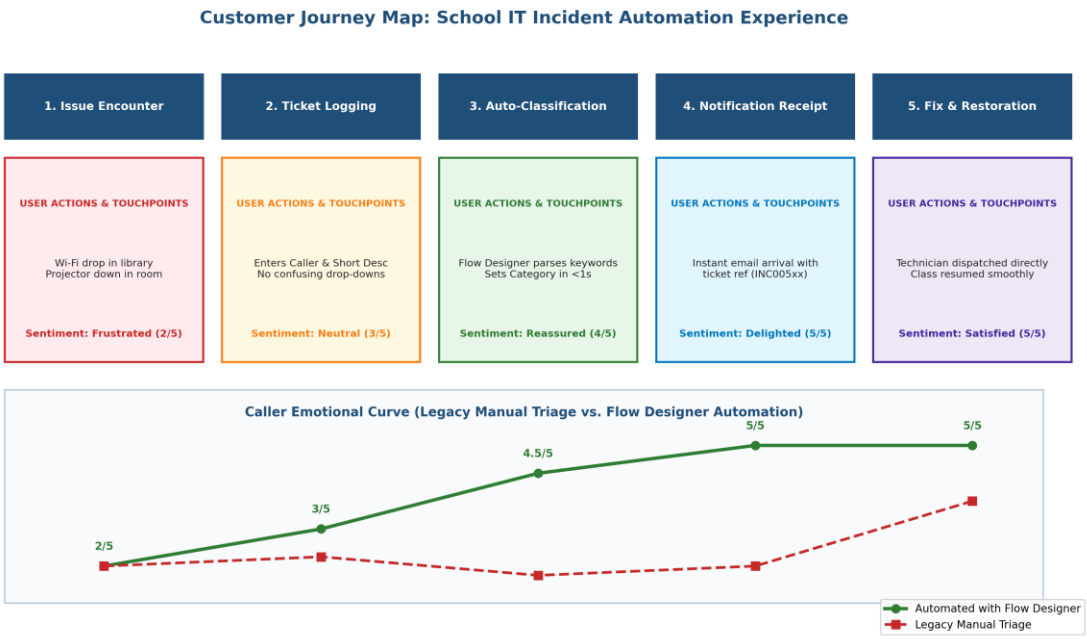

Figure 2.1: School IT Incident Automation Customer Journey Map & Emotional Touchpoints

Journey Dimension	Stage 1: Issue Encounter	Stage 2: Ticket Submission	Stage 3: Automated Classification	Stage 4: Caller Notification	Stage 5: Resolution & Feedback
User Action	Teacher encounters projector failure or Wi-Fi disconnection.	Enters Caller and Short Description in ServiceNow form.	Flow Designer evaluates keywords and updates Category/Subcategory.	Caller receives instant confirmation email with ticket number.	Technician resolves problem; caller confirms restoration.
Touchpoints	Classroom	ServiceNow Incident	ServiceNow Flow	ServiceNow	ServiceNow

	equipment, Laptop Wi-Fi settings.	Workflow Form (u_incident_workflow).	Designer Backend Engine.	Email Engine (sys_email), Caller Inbox.	Platform record update.
User Thoughts	'Class starts in 5 minutes, I need help immediately!'	'I'll just type what is broken, hope I don't need IT jargon.'	'System classifies my issue in real time without human delay.'	'Great! Confirmation email arrived in my inbox.'	'Classroom tech restored, minimal instructional disruption.'
Emotional Curve	Frustrated / Stressed (2/5)	Neutral / Hopeful (3/5)	Reassured (4.5/5)	Delighted (5/5)	Satisfied (5/5)
Opportunities	Provide quick links and QR codes on classroom podiums.	Require only Caller & Short Description; auto-classify Category.	Flow Designer matches keywords (WiFi, Projector, Password, Slow).	Automated email action with dynamic data pills.	Auto-route to specialized teams (Network, Hardware).
