Project Design Phase-II

Data Flow Diagram & User Stories

Data Flow Diagrams (DFD):

A Data Flow Diagram depicts how information flows into, through, and out of the ServiceNow Incident Workflow architecture.

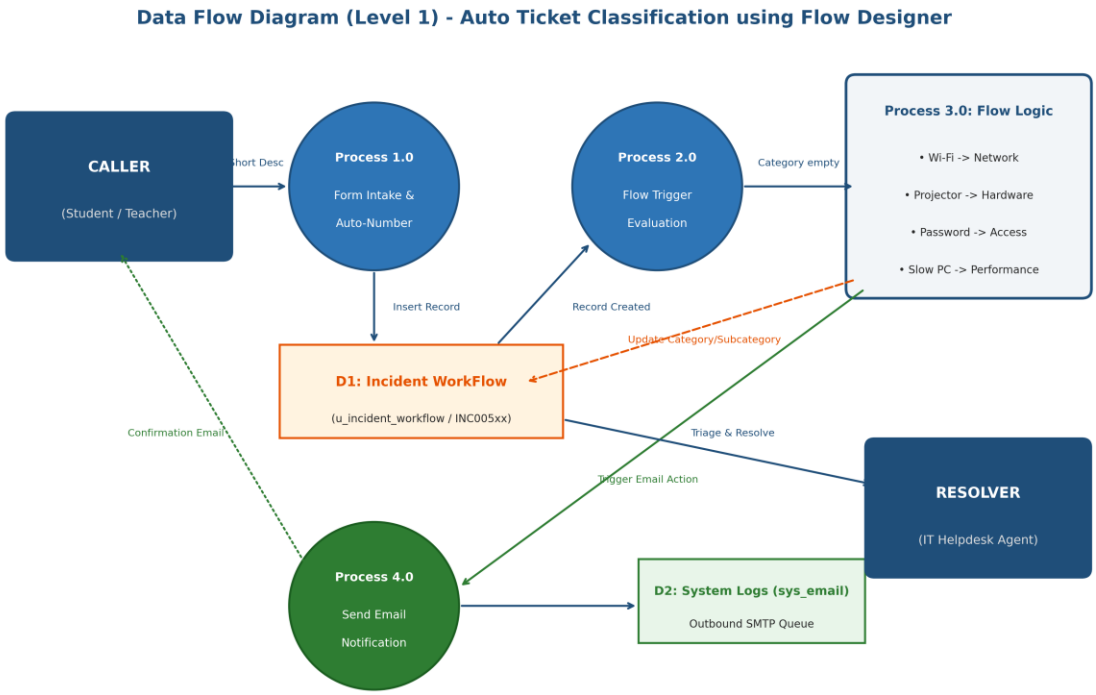

Figure 2.2: ServiceNow Level-1 Data Flow Diagram (DFD)

Process Breakdown:

- P1.0 Form Intake: Caller inputs Caller Name and Short Description into u_incident_workflow; Auto-number generates INC005xx.
- P2.0 Trigger Evaluation: Flow Designer evaluates 'Record Created' with condition 'Category is empty'.
- P3.0 Keyword Logic: Branching conditions parse Short Description for Wi-Fi, Projector, Password, and Slow Computer.
- P4.0 Record Update: Table record updated with matching Category and dependent Subcategory.

- P5.0 Notification Dispatch: Action 'Send Email' sends confirmation to Caller -> Email.

User Stories:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Caller (Teacher/Student)	Ticket Intake	USN-1	As a caller, I want to submit an IT ticket with just my name and short description.	Form saves successfully with mandatory fields only.	High	Sprint-1
System Administrator	Data Architecture	USN-2	As an admin, I want a custom table 'Incident WorkFlow' with Auto-numbering.	Auto-number generates INC005xx prefix.	High	Sprint-1
System Administrator	Taxonomy & Dependencies	USN-3	As an admin, I want Subcategory choices to dynamically filter by Category.	Subcategory choices match Category dictionary dependency.	High	Sprint-1
Caller (User)	Automation (Network)	USN-4	As a user reporting Wi-Fi issues, I want the ticket to auto-categorize as Network / Wi-Fi.	Short description with 'Wi-Fi' auto-populates Network/Wi-Fi.	High	Sprint-1
Caller (User)	Automation (Hardware)	USN-5	As a user reporting projector issues, I want the ticket to auto-categorize as Hardware / Projector.	Short description with 'Projector' auto-populates Hardware/Projector.	High	Sprint-1
Caller (User)	Automation (Access)	USN-6	As a user reporting password issues, I want ticket to auto-categorize as Access / Forgot Password.	Short description with 'Password' auto-populates Access/Forgot Password.	High	Sprint-1
Caller (User)	Automation (Performance)	USN-7	As a user reporting PC slowness, I want ticket to auto-categorize as Performance / Slow Computer.	Short description with 'Slow Computer' auto-populates Performance/Slow Computer.	High	Sprint-1
Caller (User)	Notification	USN-8	As a caller, I want an automated email upon submission with ticket	Email sent to caller's registered email with ticket details.	High	Sprint-2

			confirmation.			
Helpdesk Agent	Execution Audit	USN-9	As an IT agent, I want to view Flow Execution history to verify logic execution.	Flow execution status shows Completed with exact pill values.	Medium	Sprint-2
System Administrator	Deployment	USN-10	As an admin, I want all configurations packaged in a completed Update Set.	Update set exports cleanly to XML with 0 errors.	High	Sprint-2
