Date	03 October 2026
Team ID	**SWTID-2026-7735**
Project Name	**Auto Ticket Classification using Flow Designer**
Maximum Marks	4 Marks

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Custom Table & Schema Definition	Create table 'Incident WorkFlow' (u_incident_workflow) with Auto-Numbering (Prefix: INC, Number: 500, Digits: 5). Fields: Caller, Short Description, Description, State, Category, Subcategory, Assigned Group, Assigned To.
FR-2	Taxonomy & Dependent Choice Configuration	Category choices: [Network, Hardware, Access, Performance]. Subcategory choices: [Wi-Fi, Projector, Forgot Password, Slow Compter]. Dictionary Dependency: Subcategory dependent on Category.
FR-3	Flow Designer Trigger & Filtering	Trigger in Flow Designer on 'Incident Workflow' table when 'Record Created' and 'Category is Empty'.
FR-4	Keyword Analysis & Record Update Logic	Branches: (1) Wi-Fi/Network -> Network/Wi-Fi; (2) Projector/Hardware -> Hardware/Projector; (3) Password/Login -> Access/Forgot Password; (4) Slow/Performance -> Performance/Slow Computer.
FR-5	Automated Caller Email Notification	Flow Designer 'Send Email' action targeting Caller -> Email. Subject: 'Your Request for the issue has been submitted.' Body includes ticket confirmation.
FR-6	Application Lifecycle Management	Track all changes in 'Project Update Set'. Export to XML upon completion for migration.

Non-functional Requirements:

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Callers need provide only Caller Name and Short Description; all categorization occurs transparently in background.
NFR-2	Security & Access Control	Data access governed by ServiceNow ACLs. Only authenticated callers can submit tickets; only helpdesk roles can alter categories.

NFR-3	Reliability	Fault-tolerant execution: unclassified tickets remain safely in 'New' state for manual review.
NFR-4	Performance & Low Latency	Flow execution completes within 2 seconds. Email queues in sys_email within 1 second.
NFR-5	Availability	Native ServiceNow high-availability cloud architecture with 99.98% platform uptime.
NFR-6	Scalability & Maintainability	100% no-code in Flow Designer. Adding new keyword branches requires zero scripting.
